# INAMI M.Q.A.™ S-3

Pre-use

Full absorption

## M.Q.A.™ S-3

This type of sponge-like material has developed a growing following among surgeons and their teams throughout the world.

1. Acting like a sponge, M.Q.A. looks like a piece of cardboard, but almost instantaneously absorbs about 20x its original weight.
2. It virtually eliminates the possibility (such as with fibrous cotton) of any absorption fibers pulling off.

## M.Q.A.™ Economy Pack

(5 boxes/pack)

Each box contains 20 packets (15 M.Q.A. approx. 17mm long triangles/packet); 300 triangles in total.

## M.Q.A.™ Stick

A newly designed\*, highly absorbant sponge attached to a convenient, flexible stem, all EOG sterilized.  
10 sticks/packet, 20 packets/box; total 200 sticks.  
One carton contains 6 boxes.

\*Jointly developed with OPHTEC (Holland)

## M.S.S.™ S-4

This specially developed suctioning sponge for ophthalmic applications allows for quick, safe continuous absorption and suctioning out of liquids and/or blood during operating procedures.

● Specifications subject to change without prior notice.
