

Why using unnecessary instrument sets for your IVT ?

InVitria®

The disposable device for ALL intravitreal injections

FAST - SAFE - SIMPLE

Assures Accuracy

Fixed guide ensures proper angle, depth & distance of injection every time

Eliminates Unnecessary Instruments

No speculum, caliper or pressure plate needed

Saves Time

No need to re-sterilize instruments

Relaxes Patients

The InVitria® immobilizes the eye & hides the needle resulting in less patient anxiety

Prevents Leakage

Rotating the device pre & post injection displaces & replaces the conjunctiva over the injection hole

InVitria®
